

noble as that goal was, at least in respect to his area, it was probably an impossible goal to accomplish here in the Legislature. So what we did, we rewrote a bill along the lines I suggested earlier which goes like this. It sets up standards for operation of not only baffle sites but garbage sites, basically, or disposal sites in metropolitan cities and up to cities of the first class. It sets up standards, for example, you can't have rats and rodents and mice and other critters running around and you can't have a foul smell coming out. You give the citizen the right to enforce these through court action, if necessary, but you give, of course, the initial duty and burden to enforce these to the Director of Environmental Control. As I say, the most important part of the bill is though it was hotly fought at first, the form it is now in which is the committee amendments have been completely agreed upon and I would urge you to go ahead and adopt the committee amendments which makes it the bill, then, and advance it on.

PRESIDENT: We have some technical amendments, apparently, by Senator DeCamp to the committee amendments.

CLERK: Read. (See page 1591, Journal.)

SENATOR DeCAMP: Yes, is not there another one?

CLERK: That is it. The spelling, E & R will take care of.

SENATOR DeCAMP: There were a couple of misspelled words. E & R takes care of those?

CLERK: Get rid of this one first, then.

SENATOR DeCAMP: Okay, all this does is say that the penalties do apply to this act. It is a technical correction but I thought it should be in there. I move adoption of that.

PRESIDENT: I have an awful lot of lights on but I can't imagine any of them want to discuss this change in the spelling. Maybe that is optimistic. The question is the adoption of Senator DeCamp's amendment to Senator DeCamp's committee amendments. Record your vote. Have you voted? Record.

CLERK: 21 ayes, 0 nays on the motion to adopt.

PRESIDENT: The amendment to the amendments are adopted. Now, we have the DeCamp amendment.

CLERK: Mr. President, no, now we have the Simon amendment. (See page 1592, Journal.) Read.

PRESIDENT: Senator Neil Simon.

SENATOR SIMON: Mr. President, members of the...

PRESIDENT: We have to turn you back down, up.

SENATOR SIMON: Mr. President and members of the Legislature, are we trying to conserve energy? Is that what we are doing today?

PRESIDENT: No, but the volume control is more difficult than you think.
